

Be a hero. Support our children's education.

The math on public education doesn't compute

- \$13,612 annual cost to educate your child
- \$8,480 state and federal government contributions per child
- \$3,300 local taxes to education

– \$1832 annual shortfall per child

It's up to us to make up the difference

\$1,050,000: What kik has pledged to raise to make up the shortfall

kik is a parent-run foundation that helps bridge the gap between government funding and the actual cost to deliver the kind of high quality education our kids need to be successful in high school, college, and life.

Without the \$1,050,000 donated by the community, our schools would not be 10's. Kentfield district students have historically scored in the top 10% statewide

Every contribution to kik helps Kentfield schools afford...

- Smaller class sizes
- Classroom aides
- Education specialists
- More 1:1 attention
- Credentialed librarians

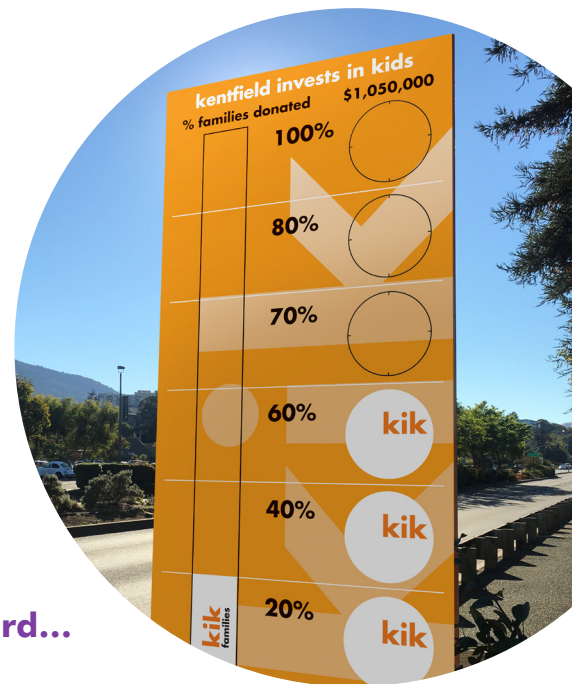

Plus important programs and classes like...

Bacich

- Computers
- Technology
- Music
- Art
- Physical Education
- STEAM
- Maker's Carts

Kent

- Computers
- Technology
- Physical Education
- Art
- Drama
- Spanish
- Architecture
- STEAM & Maker's Space
- Band & Chorus
- Poetry

10%

Amount of the school district's budget that comes from community participation

Prop 13 mandates that property taxes can't go up more than

2%

a year. As school costs rise, this important source of funding can't keep up.

Kentfield kids are counting on you to support top-quality education
